

## **Section 10:**

### **M4 Junction 16 Gateway:**

#### **Plan - Capture their attention and make them want to visit**

- [August 2026](#) - Outline planning permission approved for a new M4 service station approved on Junction 16 into Swindon.
- 240 car parking spaces, 63 lorry spaces, EV charging stations, petrol/gas station, social building including food and shops.

#### **Revitalisation plan:**

- Look at [Gloucester](#) as an example: It sells gloucester as a place rather than just a regular service station:
  - [Rated](#) the best service station with 85% satisfaction
  - Works with over 130 local producers within 30miles, its own food production, farm shop and kitchens.
  - Has the Gloucester Gateway Trust. This sends money into local communities. Up to 3p in every £1 spent in the farmshop and kitchen.

**Motorway Traffic → Local Economy → Local Businesses → Local Community**

- **What can Swindon do?:**

- Swindon Farmshop?:
  - Sells Wiltshire produce
  - Market for local business
  - Could partner with any of the many farms and farm shops already setup in Swindon
  - Portion of profits made would be re invested into the other sections for further houses and local community
  - Other farm shops in swindon: Roves Farm, Lotmead Farm, Three Trees, Purton House Organics
  - Other farmers markets: Swindon farmers markets (every sunday), wanborough (third saturday), Royal Wooten (fourth saturday), highworth (every saturday), swindon country market (every friday)
- Local food court
  - Sources food only from local vendors
  - Increase culture through substantial local offer alongside them
- Landscape the buildings to be different from regular service stations that are just a big grey building
  - Dog walking routes
  - Trees
  - Picnic area
  - Cycle paths
  - Outdoor play areas (All cheap options)
- Slightly different and dont know if possible yet but why not when leaving the motorway int Swindon make a swindon sort of gateway thing where instead of just a sign saying welcome the city is really advertised with everything inside (i.e lydiard park, railway village)
- Local producer advertising on gateways cannot afford a permanent town centre shop. Therefore increasing sales and their shelf space.

[Bridgwater services - Motorway Services Online: Bridgwater motorway service station](#)

They actually have plans to build a new service station as well showing this is a viable idea.
